DETAILED ACTION

1. This is in reply to amendment filed on January 19, 2006. Terminal Disclaimer to obviate a double patent rejection(s) set forth in the pervious office action has been submitted. Claims 1-18 are pending and are examined.
2. **No new claim has been** added.

Allowable Subject Matter

3. **Claims 1-18** are allowed. The allowance has also been indicated in the previous office action. The applicant overcomes the double patent rejection(s) set forth in the pervious office action.
4. The following is an examiner's statement of reasons for allowance:

Both independent claims **1 and 11** were amended after the first office action. In response to the first office action, Applicant amended both the independent claims 1 and 11, and added the following limitation. On claim 1, the following limitation is added, credential "**stored in encrypted form in a memory medium.**" Similarly, the following limitation has been added on independent claim 11, "**the VSA update response message including current remote access parameters for the remote network**";

Applicant invention is about providing a system and method of using a Virtual Single Account (VSA) that can improve the convenience and security performance for mobile users who remotely access office networks via various local access networks.

- With respect to **the independent claims 1 and 11 as applicant persuasively argued, the prior art** on the record namely Garrison, does not disclose/teach some elements of the limitation of the independent claims such as features that has been added with amendment.

Art Unit: 2132

None of the prior art of record taken singularly or in combination teaches or suggests applicant's invention, which is a method of connecting a mobile host to a remote network through an access network with a single password, with functional limitation recited above (added with amendment) with the combination of other limitation recited in respective independent claims.

For the reasons provided above, the independent claims 1 and 11, are found to be novel and are allowed.

5. **The dependent claims 2-10 and 12-18 which are dependent on the independent claims 1 and 11** being further limiting to the independent claims, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
